7812 7590 08/27/2009 SMITH-HILL AND BEDELL, P.C. 16100 NW CORNELL ROAD, SUITE 220 BEAVERTON, OR 97006			EXAMINER O BRIEN, JEFFREY D	
			ART UNIT 3677	PAPER NUMBER
			MAIL DATE 08/27/2009	DELIVERY MODE PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/598,728	Applicant(s) JUNTUNEN, HARRI	
	Examiner Jeffrey O'Brien	Art Unit 3677	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 July 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 13-23 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 13-23 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Objections

1. Claim 18 is objected to because of the following informalities: Line 4, “a first bore bore” appears to be a mistake and should be replaced with “a first bore”. Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims 13-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art, herein referred to as APA, in view of Junttila (US 5,992,444) herein referred to as '444.

5. For Claim 13, APA discloses each and every element except for a support part and a collar of resilient material surrounding the support part of the control device, the collar being under compression whereby the collar supports the second end of the

Art Unit: 3677

control device relative to the door closer body and restrains the control device against rocking and swaying movement relative to the door closer body due to flow of pressure medium in said channel. '444 teaches a support part (A) a collar (Annotated Fig. 2b: B) of resilient material (Column 3, Lines 10-11) surrounding a support part (A) of a control device (2), whereby the collar is capable of supporting the second end of the control device relative to the door closer body and restraining the control device against rocking and swaying movement relative to the door closer body due to flow of pressure medium in a channel. It is further noted that APA as modified by '444 would cause the collar to be compressed or pressed together with the housing of the blind hole segment of APA as seen in Fig. 2. It would have been obvious to one of ordinary skill in the art at the time the invention was made to replace the control device of APA with the control device of '444 in order to allow the control device to be made of a separate material, which provides for selecting the materials according to the qualities required of each part, simplicity of manufacture and manufacturing costs, one would further be motivated to apply the control device of '444 Figure 2 because it is formed of a solid material (Column 4, Lines 1-5) and is more rigid (less flexible) than the hollow body of Fig. 1. This lack of flexibility provided by the solid and longer extending piece of Fig. 2 of '444 is therefore capable of restraining the control device against rocking and swaying.

6. For Claim 14, '444 further teaches wherein the collar (B) has at least one chase (C) to reduce its thickness at a certain part of the collar.

7. For Claim 15, '444 further teaches wherein the collar (B) is plastic (Column 3, Lines 10-11).

Art Unit: 3677

8. For Claim 16, '444 further teaches wherein the collar (B) is plastic (Column 3, Lines 10-11) and has at least one chase (C) to reduce its thickness at a certain part of the collar.

9. For Claim 17, APA further teaches wherein said second segment of the bore is blind (as seen in Fig. 2).

10. For Claims 18-23, APA in view of '444 teach each and every element as outlined in the rejection of claims 13-17 above except for wherein the door closer comprises a second channel, a second bore, a second control device, a second collar, etc. It would have been obvious to one having ordinary skill in the art at the time the invention was made, to comprise a plurality of channels, bores, control devices, collars, etc, as it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art (see MPEP 2144.05).

Annotated Fig. 2b

Response to Arguments

11. Applicant's arguments with respect to claims 13-15 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey O'Brien whose telephone number is (571)270-

Art Unit: 3677

3655. The examiner can normally be reached on Monday through Friday 8:00am-5:30pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Victor Batson can be reached on 571-272-6987. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
